ARTICOM was founded in 1964 and started her commercial activities by supplying specific items for the petro-chemical industry. Since it distributed industrial coupling and hoses in general and grew steadily to become a leader in Belgium. Today ARTICOM supplies parts for large number of industrial applications and guides her customers with the necessary technical know how to choose an efficient and effective solution.

Our range:

- flexible PVC and rubber hoses for water, air, steam, food, chemicals, abrasive material, hydrocarbons, cement and HVAC
- stainless steel hoses with welded fittings
- all types of industrial couplings
- hoses and accessories for tankers
- compensators
- flanges, ball and butterfly valves
- hose clamps

Why choose ARTICOM?

- All types of industrial hoses and couplings for different applications can be supplied directly from our warehouse.
- For important parts we can manage your safety stock for quick response.
- We can assembly all rubber and PVC hoses, swaging up to 6" (150mm)
- We can perform hydrostatic tests with certificates.
- Our certified welders assemble metal hose by your specifications.

Our trained technical commercial team is at your service for choosing the best fit solution.
